

Neoprene CR Rubber Sheeting – Commercial Grade

Neoprene Rubber Sheeting (CR) is a synthetic material that offers excellent resistance to ageing, ozone and weathering and is commonly used in external applications for gaskets, scraper blades, sleeves and linings. Of all commercial grades this rubber sheeting is most all-round and general purpose. It provides moderate oil and chemical resistance. E.g. to animal and vegetable oils and inorganic salts, but it is not suitable for use with aromatic hydrocarbons and ketones.

Physical Property	Values
